SUMMARY

B.Sc. Infotronics Systems Engineering student at Hochschule Rhein-Waal with practical experience in technical project work. Through my Working Student(Werkstudent) role at SSP Deutschland GmbH, I have gained experience in a real industrial working environment, checking workflow behaviour, reporting issues, and working closely with the responsible IT team. My studies have given me a strong foundation in software engineering, computer networks, distributed systems, and system design. Alongside university, I continue to build full-stack development experience through self-learning and personal projects. I am looking for a working student or internship role where I can contribute to a development or QA team, learn from real projects, and grow further in software development.

EXPERIENCE

Technical Support / Administrative Assistant (Werkstudent)

SSP Deutschland GmbH

09/2025 – Present
www.foodtravelexperts.com

- Provided first-level technical support and resolved basic server, system, and network-related issues.
- Monitored technical systems and reported complex server problems to the responsible IT team.
- Maintained and regularly updated operational and financial records using Microsoft Excel.
- Entered daily income, expenses, invoices, and transaction details into the company database.
- Supported employees with computer, printer, software, and login-related technical issues.
- Assisted with database maintenance, data entry, and record updates.

Part-Time Research Assistant

Computer Networking Lab · Rhein-Waal University of Applied Sciences

06/2024 – 09/2025
Kamp-Lintfort, Germany

- Supported the setup and configuration of network simulations.
- Assisted with system performance monitoring and technical experiments.
- Prepared research documentation and recorded experimental results.

EDUCATION

Hochschule Rhein-Waal University of Applied Sciences

B.Sc. Infotronics Systems Engineering

09/2022 – Present
Kamp-Lintfort, Germany

- Relevant coursework: Software Engineering, Computer Networks, Distributed Systems, Innovative Technology, and Computer Architecture.

Dhaka City College

Science – Advanced Mathematics and Physics

06/2017 – 12/2019
Dhaka, Bangladesh

PROJECTS

Distributed Housing Platform Microservices

- Developed a microservices-based housing application using Django, RESTful APIs, modular services, and scalable distributed design.
- Collaborated using Git version control, branch management, pull requests, and merge workflows.
- Followed Agile-based task planning, iterative feature development, debugging, and system integration in a team environment.

Automated Code Reviewer

- Developed an AI-assisted web application for detecting programming errors and suggesting corrected code.
- Implemented code analysis, debugging recommendations, automated reports, and downloadable review results.
- Built the application using Python, FastAPI, HTML, CSS, JavaScript, and database integration.

Mobile App Development

- Created visual simulations of numerical root-finding methods using NumPy and SciPy for scientific computation and numerical analysis.
- Integrated APIs, managed local databases, and implemented core application features.
- Performed application testing, bug fixing, and performance optimization to ensure a smooth user experience.

Doctor Appointment System

- Developed a Python-based web application to evaluate and manage healthcare communication sessions.
- Implemented patient session tracking, automated performance evaluation, and PDF report generation.
- Created secure user and administrator dashboards for managing patient records and session history.

SKILLS

Programming and Development: HTML, CSS, Tailwind CSS, JavaScript, Node.js, Python, Java, Object-Oriented Programming, Django REST Framework, RESTful APIs

Testing and Quality Assurance: Postman, Chrome DevTools, API Testing, Software Testing, Debugging, Bug Investigation, Quality Assurance, Jira

Cloud and DevOps: AWS, Docker, Linux, Git, GitHub, CI/CD, Cloud Services, Distributed Systems

AI and Automation: AI Agents, Workflow Automation, SaaS Platforms

Development Tools and Methodologies: VS Code, Eclipse, Agile Methodology, Scrum, Teamwork, Collaboration

CERTIFICATIONS

Full-Stack Web Development	2026
<i>Programming Hero</i>	Online
• HTML, CSS, Tailwind CSS, JavaScript, Node.js, MongoDB, databases, web development, hands-on practice, and projects.	
DevOps Engineering	2026
<i>Udemy</i>	Online
• Cloud computing, IaaS, PaaS, public, private, and hybrid clouds, including AWS, Azure, and GCP, Cloud security fundamentals and cost optimization strategies.	
Python Programming	2023
<i>Udemy</i>	Online
• Beginner-to-intermediate Python programming, core syntax, object-oriented programming, and problem-solving.	

LANGUAGES

English	Advanced – C1
German	Upper Basic – A2
